- Maximum Usable Space

Western Fabric Structures represents and distributes for major tension fabric structure manufacturers. Our building's clear-span design allows for a variety of uses, from equipment storage to stabling, warehousing to event centers.

With over 12 years in the industry, our team coordinates the design, engineering and foundation of each project, making sure each installation runs smoothly from start to finish.

Our commitment to provide high quality, cost effective, pre-engineered fabric structure systems is what has kept our customers satisfied year after year.

We continue to be there for you after the job is complete.
